Experiment -2

Flight Reservation System

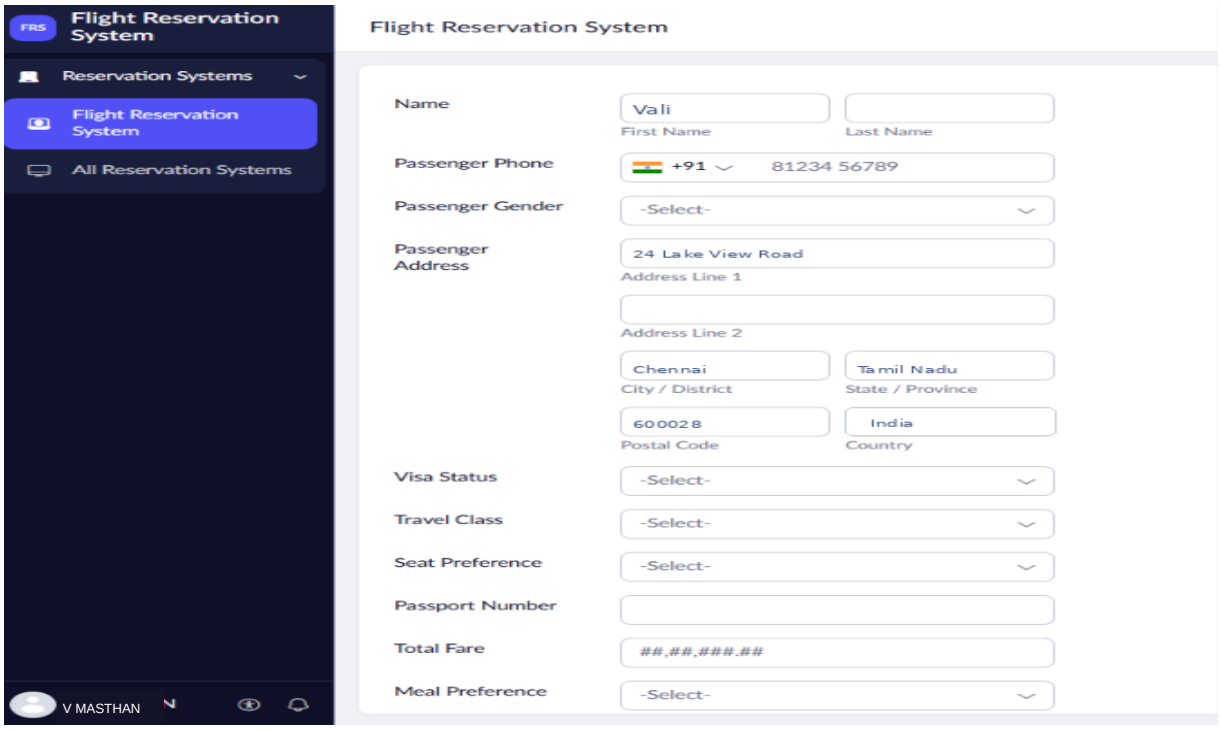

Aim

To create a Flight Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

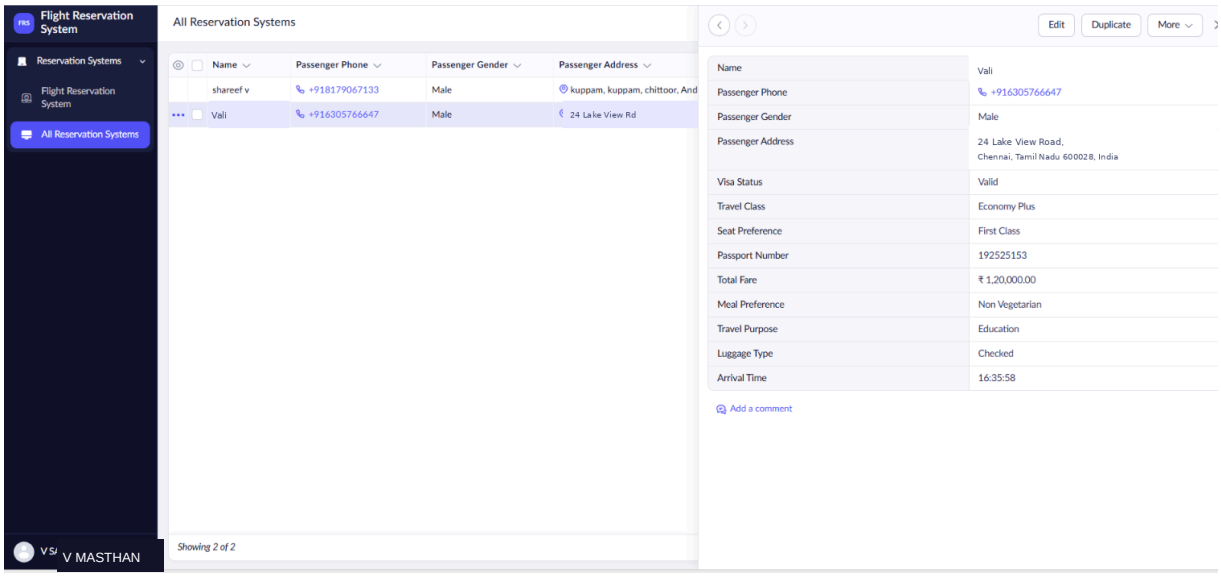

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Flight Reservation System.
4. Create a new form named Flight Reservation.
5. Add the required fields: Name, Age, Round Trip, From, To, Departure, Travelers, Class, Fare Type, and
International/Domestic Flights.
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample passenger and flight reservation details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different flight reservation details.
12. Verify that the Flight Reservation System works successfully as a SaaS application

Implementation Input:

Output:

Result

Thus, a Flight Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application. The required fields were entered, the sample record was submitted, and the stored output was verified in the cloud.
